

## Soil Test Order Form

The Soil Test is the cornerstone of the High Brix Garden Program. Why guess when you can know for sure? That is the guiding premise behind taking a soil test. Follow the steps outlined below to order your soil test.

### Step 1 - Collect Soil Sample

Take a soil sample by digging a vertical hole in the soil to a depth of 6 inches. Take an even slice off the side from top to bottom with a clean spade that is not rusty. Place in a clean bucket that does not have any feed, salt, or fertilizer residues. Take several more samples like this in other areas of the garden. Mix all the soil together thoroughly in the bucket. After mixing, put about 1 ½ cups into a plastic Ziploc baggie.
